SEQUENCE FOR DONNING PERSONAL PROTECTIVE EQUIPMENT (PPE):

1. PROTECT YOUR BODY

Ensure the gown:

- Covers torso from neck to knees
- Covers arms to end of wrists
- Wraps around the sides to fasten at neck and back

2. PROTECT YOUR FACE

- Create a curve in the flexible band for the nose bridge and expand the mask
- Secure the ties or elastics at the middle of the head and neck, or fasten the ear loops
- Fit it snugly to your face and below your chin – fit check the N95 and P2 mask
- Place the face shield or eyewear over the face and eyes and adjust to fit

3. PROTECT YOUR HANDS

- Extend the cuffs to cover the wrist of the gown
- Limit the surfaces touched
- Change gloves when torn or heavily contaminated
- Perform hand hygiene as required

FINALLY STOP and CHECK all PPE is in place

SEQUENCE FOR ADVANCED DOFFING PERSONAL PROTECTIVE EQUIPMENT (PPE):

Remember! The outside and front of your PPE, including the sleeves of the gown, are contaminated. If hands become visibly contaminated during PPE removal, wash hands before continuing.

REMOVE GOWN THEN GLOVES

Outside of gown and gloves are **CONTAMINATED!**

- 1a.**
- With gloved hands, grasp the front of the gown at the shoulders and pull the gown forward to snap the tabs at the back
 - Peel off the gown, rolling it inside out
- 1b.**
- Continue over the gloves so that they too are rolled inside out
 - Discard gown and gloves into a waste container
 - Perform hand hygiene using ABHR or soap and water

2. REMOVE PROTECTIVE EYEWEAR

- Grasp the ear or head piece and lift away from face
- Place reusable eyewear in the designated receptacle for cleaning or
- Discard disposable eyewear into waste container for disposal

3. REMOVE MASK OR PARTICULATE RESPIRATOR (N95 OR P2)

- Remove by touching ties or elastics only, starting with the bottom then top ties or bands
- Discard in designated waste container

4. PERFORM HAND HYGIENE

- Wash hands with soap and water or use an alcohol-based hand rub immediately after removing PPE

PROTECTIVE APPAREL

HALYARD* ISOLATION GOWNS

AAMI 3 ISOLATION GOWNS

- AAMI Level 3 rated gowns
- Heavyweight SMS fabric
- For use when expected risk of exposure to fluid is between moderate and high
- Tape-tab neck closure
- Tie waist, elastic cuffs

Code	Description	Packaging
54310	HALYARD* Tri-Layer AAMI3 Isolation Gown, Blue, Large	Units/Bundle = 10 Bundles/Case = 10 Units/Case = 100
54311	HALYARD* Tri-Layer AAMI3 Isolation Gown, Blue, X-Large	Units/Bundle = 10 Bundles/Case = 10 Units/Case = 100

AAMI 2 ISOLATION GOWNS

- AAMI Level 2 rated gowns
- For use when expected risk of exposure to fluid is between low and moderate
- Medium-weight tri-layer fabric
- Tape-tab neck closure
- Tie waist, elastic cuffs

Code	Description	Packaging
69979	Isolation Gown, Yellow, Large	Units/Bundle = 10 Bundles/Case = 10 Units/Case = 100
69981	Isolation Gown, Blue, Large	Units/Bundle = 10 Bundles/Case = 10 Units/Case = 100
69987	Isolation Gown, Blue, X-Large	Units/Bundle = 10 Bundles/Case = 10 Units/Case = 100

PROTECTIVE APPAREL

IMPERVIOUS COMFORT GOWNS

- Extensively tested for impact penetration and hydrostatic pressure to combine proven protection with comfort
- Impervious Tri-layer spunbond with polyethylene film laminate coating in front
- AAMI L3 on front of gown, tie attachment and sleeve

Code	Description	Packaging
5511	Impervious Comfort Gown, Knit Cuffs, Full back, Yellow, Regular	Units/Bundle = 10 Bundles/Case = 5 Units/Case = 50
5512	Impervious Comfort Gown, Knit Cuffs, Full back, Yellow, X-Large	Units/Bundle = 10 Bundles/Case = 5 Units/Case = 50

IMPERVIOUS BASIC FILM GOWN

- For use when expected risk of exposure to fluid is between moderate and high
- Tri-layer spunbond with polyethylene laminate coating

Code	Description	Packaging
69490	Film Gown, Blue, Universal Size	Units/Dispenser = 15 Dispensers/Case = 5 Units/Case = 75

CHEMOTHERAPY GOWN

- Potential for soaking and heavy fluid contact in front
- Tested with the 52 chemotherapy drugs required by ASTM test method
- F739 Tested with 3 additional standard widely used chemotherapy drugs: meets Liquid Barrier Performance Standards ASTM 1670 and 1671
- Highest level of protection against flammability
- Polypropylene with polyethylene coating

Code	Description	Packaging
47346	Chemo360. Knit Cuffs, Over-the-head Perforated Closed-Back, Blue, Universal	Units/Case = 100
47347	Chemo360. Knit Cuffs, Over-the-head Perforated Closed-Back, Blue, XX Large	Units/Case = 100

Code	Description	Packaging
69606	Comfort Gown, Knit Cuffs, Over-the-head Perforated Open-Back, Blue, Universal	Units/Case = 100

NOTE: Please see package inserts for directions for use for each of these products.

FOOTWEAR

X-TRA TRACTION* SHOE COVERS

- Blue
- Protective tri-layer SMS fabric
- Traction strips
- Natural rubber latex-free

Code	Description	Packaging
69252	X-TRA TRACTION* Shoe Cover, Universal	Units/Dispenser = 100 Dispensers/Case = 3 Units/Case = 300
69254	X-TRA TRACTION* Shoe Cover, X-Large	Units/Dispenser = 80 Dispensers/Case = 3 Units/Case = 240

HEAVY-DUTY SHOE COVER

Code	Description	Packaging
69551	Heavy-Duty Shoe Cover, Blue, Universal Size	Units/Dispenser = 100 Dispensers/Case = 3 Units/Case = 300

NOTE: Please see package inserts for directions for use for each of these products.

PROTECTIVE APPAREL

ANKLE TOPS

ANKLE GUARD* SHOE COVER

- Moderate fluid contamination
- Over the ankle coverage
- Protective tri-layer SMS fabric
- Adhesive traction strips
- Natural rubber latex-free

Code	Description	Packaging
69353	ANKLE GUARD* Shoe Cover, Tri-Layer Fabric, Adhesive Traction Strips, X-Large	Units/Dispenser = 90 Dispensers/Case = 3 Units/Case = 270
69253	ANKLE GUARD* Shoe Cover, Blue, Universal Size	Units/Dispenser = 90 Dispensers/Case = 3 Units/Case = 270

KNEE HIGHS

HI-GUARD* ULTRA FULL-COVERAGE BOOT

- Potential for heavy fluid contamination
- Knee high boot
- Plastic film coating over tri-layer fabric
- Two 1" (2.5cm) urethane foam traction strips
- Natural rubber latex-free

Code	Description	Packaging
69572	HI-GUARD* Full Coverage Boot, Universal	Units/Dispenser = 30 Dispensers/Case = 4 Units/Case = 120
69672	HI-GUARD* Full Coverage Boot, X-Large	Units/Dispenser = 30 Dispensers/Case = 4 Units/Case = 120

HI-GUARD* REGULAR FULL-COVERAGE BOOT

- Potential for moderate fluid contamination
- Knee high boot
- Protective SMS with film coating on foot area
- Two 1" (2.5cm) adhesive traction strips
- Natural rubber latex-free

Code	Description	Packaging
69571	HI GUARD* Full Coverage Boot, Blue, Universal Size	Units/Dispenser = 50 Dispensers/Case = 3 Units/Case = 150
69671	HI GUARD* Full Coverage Boot, Blue, X-Large Size	Units/Dispenser = 50 Dispensers/Case = 3 Units/Case = 150

NOTE: Please see package inserts for directions for use for each of these products.

PROFESSIONAL JACKETS

- Protective tri-layer SMS fabric
- Potential for Moderate Fluid Contact
- Knit Collar and Cuffs
- 5 snaps
- 2 Reinforced Pockets
- Neck Loop for Hanging
- Size / Name Label

Code	Description	Packaging
10067	Professional Lab Jacket, Blue, Medium	Units/Case = 24
10078	Professional Lab Jacket, Blue, Large	Units/Case = 24

COVERALLS

Code	Description	Packaging
10075	Extra Protection Coverall with Elastic Cuffs, White, Large	Units/Case = 24

NOTE: Please see package inserts for directions for use for each of these products.

THE RIGHT FACIAL PROTECTION: PUTTING YOUR SAFETY FIRST

The most important element in selecting a face mask is the confidence that comes from knowing that both you and your patients are adequately protected.

Not all face masks are created equal; some masks have a higher level of protection than others. At Halyard, we display the American Society for Testing and Materials (ASTM) International Standards for face masks on our packaging, so that you can face the unknown, knowing you're protected.

Medical Face Mask Material Requirements by Performance LEVEL ASTM International Standard F2100-11

CHARACTERISTIC	LEVEL 1 BARRIER	LEVEL 2* BARRIER	LEVEL 3 BARRIER
Bacterial filtration efficiency at 3 microns, %	≥ 95	≥ 98	≥ 98
Differential pressure, mm H ₂ O/cm ²	< 4.0	< 5.0	< 5.0
Sub-micron particulate filtration efficiency at 0.1 micron, %	≥ 95	≥ 98	≥ 98
Resistance to penetration by synthetic blood, minimum pressure in mm Hg for pass result	80	120	160
Flame spread	Class 1	Class 1	Class 1

SUPERIOR PROTECTION NEVER FELT SO GOOD

All Halyard next generation FLUIDSHIELD* Face Masks incorporate four layers of barrier protection, including a POWERGUARD* treated filter media for enhanced protection and an inner SO SOFT* lining to deliver the critical balance of protection and comfort.

Whatever your clinical needs and personal preferences, you can be confident there is a HALYARD* Face Mask that meets your requirements.

FACIAL PROTECTION

For the highest levels of protection, make sure you choose HALYARD* Face Masks and Eyewear.

NIOSH APPROVED N95 RESPIRATOR FACE MASKS

Code	Description	Packaging
46727	FLUIDSHIELD* Level 3 N95 Particulate Filter Respirator and Surgical Mask, Pouch-Style with Headbands, Regular Size, Orange	Units/Box = 35 Boxes/Case = 6 Units/Case = 210

FACIAL PROTECTION

EYEWEAR

GUARDALL* FACE SHIELD

- Designed for procedures and environments where risk of exposure to blood and/or bodily fluids through splashing is possible
- Equipped with a foam band and headband
- Can be worn with or without glasses or goggles
- Resistant to fogging

Code	Description	Packaging
41204	GUARDALL SHIELD* Full-Length Visor Only, (No Mask), Clear	Units/Case = 40
41205	GUARDALL SHIELD* Three-Quarter Length Visor Only (No Mask), Clear	Units/Case = 40

SAFEVIEW* GLASSES

- For use in situations which may involve splashing or spraying
- Designed to be lightweight for added comfort in use
- Shipped with colorful frames to appeal to a variety of preferences
- Single-use lenses may be easily replaced into reusable frames
- Designed to be easily worn over most prescription glasses
- Constructed from natural rubber latex-free materials

Code	Description	Packaging
50004	SAFEVIEW* Assembled Glasses	5 Pkg. of 10 units Case = 50 Assembled Glasses
50002	SAFEVIEW* Frames / Assorted Colours	10 Pkg. of 10 units Case = 100 Frames
50001	SAFEVIEW* Replacement Lenses	10 Pkg. of 25 units Case = 250 Lenses

99018	Nebulisers	Units/Box = 2 Boxes/Case = 1

NOTE: Please see package inserts for directions for use for each of these products.

FACIAL PROTECTION

TEST METHODS FOR FACE MASKS

BACTERIAL FILTRATION EFFICIENCY (BFE) AT 3µm: ASTM F2101

Determines the bacterial filtration efficiency (BFE) of various filtration materials. This test employs a ratio of the bacterial challenge counts to sample effluent counts to determine the percent bacterial filtration efficiency (%BFE). The test procedure allows a reproducible bacterial challenge to be delivered to test materials, and provides a standard procedure for comparison of filtration materials.

The higher the BFE, the better the filtration efficiency, the better the protection.

DIFFERENTIAL PRESSURE OR BREATHABILITY (DELTA P): 4.4.1.2 of MIL-M-36954C

Determines the air exchange differential of porous materials measured in mm H₂O/cm². This technique employs a water manometer differential upstream and downstream of the test material at a constant flow rate.

The lower the delta P, the more breathable the material is. However, this can also mean lower levels of protection.

FLUID RESISTANCE: ASTM F 1862

Standard Test Method for Resistance of Medical Face Masks to Penetration by Synthetic Blood (Horizontal Projection of Fixed Volume at Known Velocity).

Developed to simulate a challenge to the fluid splash resistance of a face mask under conditions similar to actual use. During this test, face masks are insulted with synthetic blood, and graded as a pass or fail. The masks are evaluated at three pressures: 80, 120, and 160mmHg.

The higher the pressure at which a mask passes, the greater the fluid resistance.

NATIONAL INSTITUTE FOR OCCUPATIONAL SAFETY AND HEALTH (NIOSH)

Certification for Particulate Respirators: 42 CFR 84 Certified in USA

NIOSH Certification ensures the respirator has undergone the stringent testing and quality assurance requirements to meet an expected level of protection.

If a respirator has been NIOSH-certified, it will have the following markings on the respirator's packaging, user instruction insert, and/or on the respirator itself:

- The NIOSH name or logo;
- The NIOSH filter classification – in this case "N95";
- The NIOSH test and certification – or TC – approval number;
- The Approval Holder's business name (usually the manufacturer), registered trademark, or an easily understood abbreviation;
- The model or part number; and
- The manufacturing lot number.

The respirators certified under the NIOSH 42 CFR 84 regulation are tested under much more demanding conditions, providing a higher level of worker protection.

PARTICLE FILTRATION EFFICIENCY (PFE) AT 0.1µm: ASTM F2299

Measures the filtration efficiency of a face mask against small particles, usually 0.1 micron. Latex particles are aerosolised, dried, and passed through the test samples. Control counts are performed, without a test sample in the system. The filtration efficiency is calculated by comparing the results of the test samples to the results of the control counts.

The higher the PFE, the better the filtration efficiency, the better the protection.

EXAMINATION GLOVES

THE WORRY-FREE CHOICE FOR EVERYONE, EVERYWHERE

Your hands are essential to the care you provide to your patients. With 5–15% of healthcare workers susceptible to latex allergy, caring for you and your hands by reducing the exposure to latex reduces the risks and harmful effects of an allergic reaction¹.

Halyard Health created a patented, natural rubber latex-free glove to provide you with the comfort, fit and sensitivity of latex, without the risk of exposure. It's the one glove for all your non-surgical needs, facility-wide².

INNOVATION IN PACKAGING TO REDUCE CROSS CONTAMINATION AND WASTE

As part of our commitment to reducing the risk of HAIs, Halyard introduced the SmartPULL* glove dispensing system to the STERLING* and LAVENDER* Nitrile Exam Glove boxes.

The smaller tab reduces the risk of contamination and waste by limiting the contact and potential fall-out from adjacent gloves. The larger tab enables easier access as the box empties.

Our advanced packing technology has also reduced the waste in storage space with the larger, 200–250 count per box providing you with more for less.
