# PRESENTING THE SMART-FOLD\* STERISYSTEM®

Change is good! That's why Halyard and Belintra have teamed up to bring you the SMART-FOLD\* STERISYSTEM®, a unique system that combines HALYARD\* SMART-FOLD\* Sterilization Wrap with BELINTRAS storage and transport system. This two-touch solution not only ensures that sterility has been maintained from sterilization through to use in the OR, it confirms it! And THIS changes everything!

That's because the long-held belief that rigid containers are infallible just isn't true. They cause untold problems and headaches. Everything from failure to maintain sterility to inefficiencies in labor, design and space.

Created to solve these problems, the SMART-FOLD\* STERISYSTEM® eliminates stacking, which reduces the chance for tears, cuts and holes. This enhances clinical confidence and reduces costs, time and labor associated with reprocessing.

It also increases efficiencies, is more ergonomic and features aseptic opening. And now with our new SMART-FOLD\* Select Sterilization Wrap combined with BELINTRAS storage and transport system; we have an economical solution that is much preferred over problematic containers.

For the utmost in patient safety and the ultimate in long-term savings, this is the system for you. That's because it addresses four critical areas of focus:

2-Touch System  
and  
Aseptic Opening

Better  
Throughput

Better  
Ergonomics

Save on Space  
and Storage

# SMART-FOLD\* STERILIZATION WRAP

## SMART-FOLD\* STERILIZATION WRAP

**HALYARD\* STERILIZATION WRAP HAS BEEN TESTED AND VALIDATED FOR USE WITH THE STERISYSTEM.®**

SMART-FOLD\* provides unique time saving and clinically beneficial features that make it the ideal wrap to be used with the efficient Sterisystem® SMART-FOLD\* allows Sterile Processing Professionals to process their heaviest trays with the utmost confidence that sterility will be maintained to help protect what matters most, the patient.

**SMART-FOLD\* HIGH PERFORMANCE**

SMART-FOLD\* HIGH PERFORMANCE Sterilization Wrap is Halyard's highest grade, and most durable wrap. We recommend this for your heaviest sets.

**SMART-FOLD\* SELECT**

SMART-FOLD\* SELECT Sterilization Wrap is expressly optimized at a lighter grade to work within the SMART-FOLD\* STERISYSTEM® for trays weighing up to 25lbs.

In a recent user study, CS and OR clinicians found SMART-FOLD\* HIGH PERFORMANCE Sterilization Wrap to be much better when compared to traditional wrap<sup>1</sup>.

**ERGONOMIC WRAPPING DESIGN**

**82%** of the CS clinicians find SMART-FOLD\* more ergonomic with less physical stress during wrapping.<sup>1</sup>

**ASEPTIC UNWRAPPING**

**88%** of clinicians find the design of SMART-FOLD\* better for aseptic opening.<sup>1</sup>

**CONFIDENCE IN STERILITY**

**78%** of clinicians are more confident that sterility has been maintained with SMART-FOLD\*.<sup>1</sup>

# SMART-FOLD\* STERILIZATION WRAP

**THE ASSURANCE YOU NEED.  
THE EFFICIENCY YOU APPRECIATE.**

Depend On SMART-FOLD\* for Multifaceted Performance.

**STRONGER**

Reinforced zones protect tray edges and corners.

**FASTER WRAPPING**

Positioning Strips hold material for easier more ergonomic wrapping.

**MORE ACCURATE**

Reference Lines serve as guides for tray placement.

**OPTIMIZED AIRFLOW**

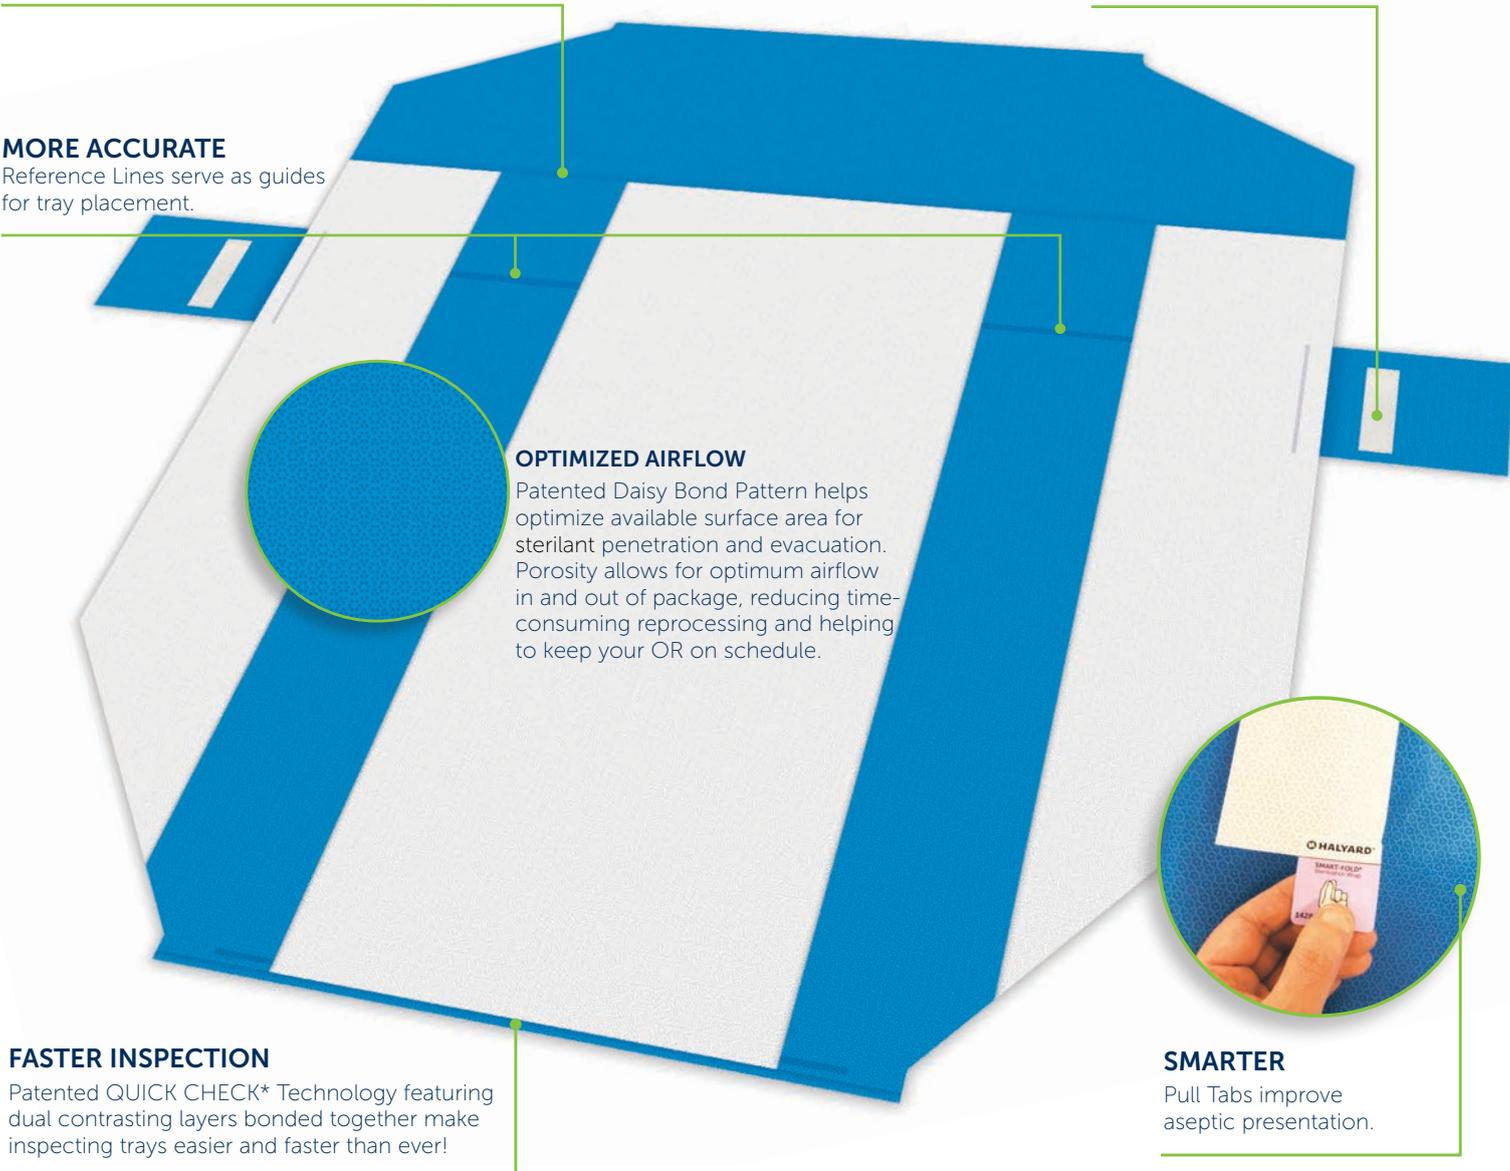

Patented Daisy Bond Pattern helps optimize available surface area for sterilant penetration and evacuation. Porosity allows for optimum airflow in and out of package, reducing time-consuming reprocessing and helping to keep your OR on schedule.

**FASTER INSPECTION**

Patented QUICK CHECK\* Technology featuring dual contrasting layers bonded together make inspecting trays easier and faster than ever!

**SMARTER**

Pull Tabs improve aseptic presentation.

# STORAGE SOLUTIONS

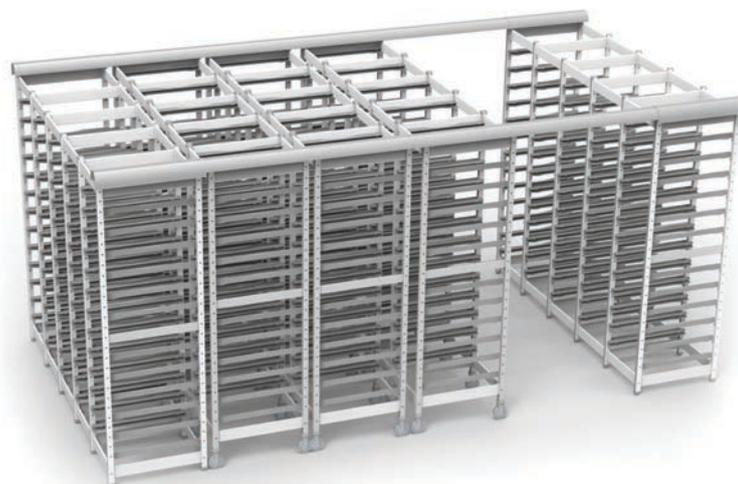

# STORAGE SOLUTIONS

**TWO STORAGE SYSTEMS TO CHOOSE FROM:**

**UBeFLEX® Stationary Storage System**

**UBeTrack™ Mobile Storage System**

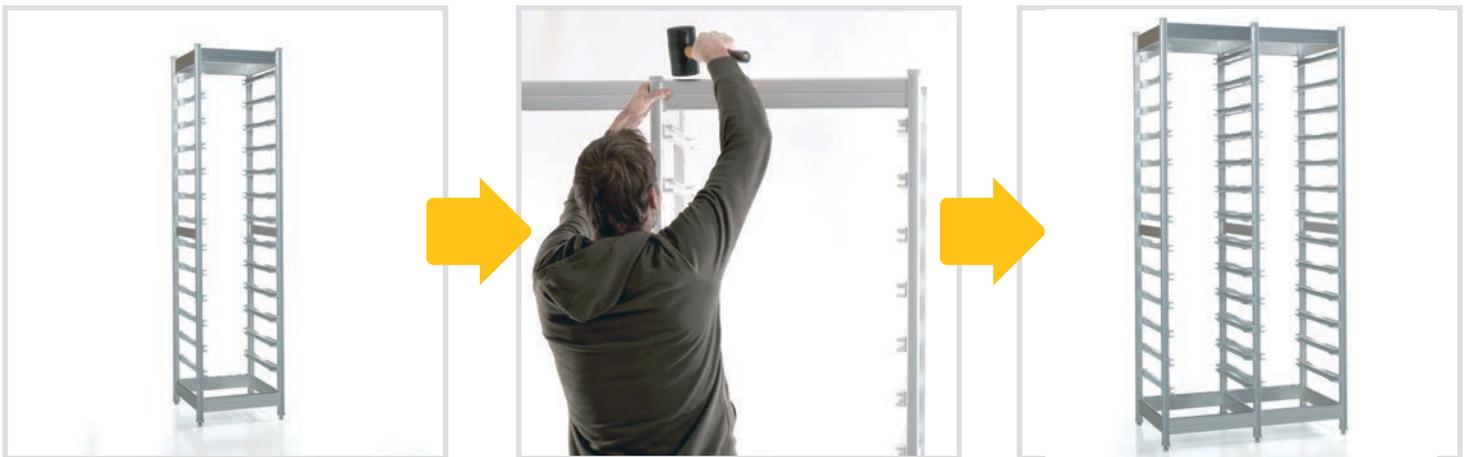

## UBEFLEX® STATIONARY STORAGE SYSTEM

Designed for quick assembly, functionality, durability and stability, the unique UBeFlex® modular stationary storage system is made from anodized aluminum and other high-quality, anti-static synthetic materials, which means it can be used in both sterile storage and non-sterile environments.

Its modular construction, in various column configurations, may be combined with open shelving so it can be utilized in multiple areas of your facility. And this ergonomic and hygienic storage solution can also be used as a “pass-through” rack.

For savings on space and storage and enhanced efficiency, this unit is ideal.

For assembly, the UBeFlex® modular stationary storage system includes just 2 posts and a spacer set. The spacer set features 4 connectors that connect the posts. To expand on this configuration, you simply need an extra post and spacer set. This flexibility allows it to be adapted to the size and shape of any room.

## UBETRACK™ MOBILE STORAGE SYSTEM

The dynamic UBeTrack™ is a high-density, space-saving mobile storage system with adjustable shelving.

Efficient and user-friendly this system is very lightweight, making the mobile racks quick and easy to move. Made from anodized aluminum and high-quality, antistatic synthetic materials, the unique UBeTRACK™ can be used in both sterile storage and non-sterile environments.

By placing the runner system at the top, cleanliness is maintained, and the unit is easy to pass with transport trolleys.

# INSTRUMENT TRAYS & LIDS

# Dry-Base<sup>®</sup> Stainless Steel Instrument Trays and Lids

## Size Guide

## STERISYSTEM<sup>®</sup> DRY-BASE<sup>®</sup> INSTRUMENT TRAYS

Our Sterisystem<sup>®</sup> Dry-Base<sup>®</sup> instrument trays are manufactured from highly polished grade stainless steel.

The smooth, dry base completely traps any condensation moisture that may stick to the wrap. This ensures that condensation moisture can heat up or evaporate under the influence of radiation, convection or conduction.

Our instrument trays have a smooth finished top wire. This reduces the chance of perforating or tearing the wrap.

## DIN

### TRAY AND LID SOLD TOGETHER (EACH)

# TRANSPORTATION

# Sterisystem® Transport Carts

THREE CARTS TO CHOOSE FROM:

Open Stericart

Modular Cart

Closed Stericart

# Sterisystem® Open Carts

## OPEN STERICARTS (CART WASHABLE)

The open Stericart in stainless steel is designed for indoor transport of both instrument sets and consumables between the SPD and the OR.

The cart is available in both an ISO size (24 x 16 inches) and a double DIN size (24 x 24 inches). When using the double DIN version, the capacity per level is doubled if your facility uses DIN transport baskets or trays.

The yellow push handles are a unique indicator that the cart may safely go through the cart washer.

### OPEN STERICARTS STAINLESS STEEL (CART WASHABLE)

Code	Description	Case Quantity
47397	ISO Deep Type (62"H x 28"D x 24"W) (24"D x 16"W)	1
47469	ISO Wide Type (62"H x 20"D x 31"W) (16"D x 24"W)	1

Code	Description	Case Quantity
47396	Double DIN (62"H x 28"D x 31"W) (24"D x 24"W)	1

# Sterisystem® Open Carts

## MODULAR CARTS (NOT CART WASHABLE)

Our ISO transport carts, based on ISO 16 x 24 inch, have been specifically designed to transport goods between various units.

They allow logistics staff, pharmacists and nursing staff to easily transfer trays from the storage system to the carts and vice versa.

The runners consist of U and L profiles. They are compatible with all the common ISO trays, baskets and shelves. Modular baskets or trays simply slide into the U profile; the L profile has been designed to accommodate baskets with a high edge.

Code	Description	Case Quantity
47810	ISO Deep Type (71"H x 28"D x 21"W)	1

Code	Description	Case Quantity
47812	ISO Wide Type (71"H x 20"D x 29"W)	1

Code	Description	Case Quantity
47811	Double ISO Deep (71"H x 28"D x 38"W)	1

# Sterisystem® Closed Carts

## CLOSED STERICARTS (CART WASHABLE)

The closed Stericart features washing-tunnel-resistant stainless steel, is manufactured based on the DIN standard dimensions of 12 x 24 inches and can be used with 2 DIN positions one after the other. The 2-inch extra depth at the back allows this transport cart to also be used for sterile transport of slightly longer sets.

The lower model (43 inch) closed Stericart can double as a sterile field in the operating room, while the "Extra-Wide" model can serve to transport packages up to 37 x 24 inches.

Fixed durable yellow plastic runners, bumpers, push handles and latches set this cart apart from the rest. The well thought out design is ergonomic and allows for enhanced space savings when transporting sterile instrument sets to the OR and contaminated sets back to the SPD.

## STERICART STAINLESS STEEL CARTS (CART WASHABLE)

### LOW CART

Code	Description	Case Quantity
47399	Low (44"H x 29"D x 29"W) (24" x 24")	1
